## **DETAILED ACTION**

### ***Amendment***

1. Receipt is acknowledged of the amendment and drawings filed 30 November 2007.

### ***Allowable Subject Matter***

2. Claims 1-7 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Although the best prior art of Kinoshita et al. (U.S. Patent No. 6,115,319) and Walter et al. (U.S. Patent No. 5,856,788) teach the use of circuits within data carriers (i.e. RFID tags of Walter), the best prior art of record fails to specifically teach the interactions within the circuit of the data carrier, mainly, that the circuit comprises information-voltage generating means that are arranged to receive a control signal, (wherein the control signal is of a voltage value that is at most equal to the value of the supply voltage), wherein the information voltage is generated with the information-voltage generating means by using the control signal, and that the information-voltage generating means has voltage-raising means that are arranged to raise the voltage value of the control signal. Hence the best prior art of record fails to teach the invention as set forth in claims 1-7 and the examiner can find no teaching of the specific data carrier, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
